RAG-powered emergency guidance from your knowledge base

Rectangular Snip

I don't have the most up-to-date information on specific emergency helpline numbers.

However, I can tell you that 112 is the national emergency number in India, which covers police, fire, and ambulance.

For other specific emergency helplines, I recommend searching online for the latest information and assistance. It's also a good idea to save important numbers, such as the national emergency number, in case of an emergency.

Please note that emergency numbers may be subject to change, and it's essential to verify their accuracy.
